Work story

Dapps Factory Project Manager and Fullstack Developer

01/2024 – 04/2024

I successfully constructed a chat interface integrated with PDF and AI functionality for the Dapps Factory team. This innovative solution was specifically designed to enhance user experience and streamline project workflows within the **Galicia Bank** ecosystem.

Key Responsibilities:

- Development, Integration and Project Leading
- Monitor Project Progress and Set Deadlines
- Collaboration
- Testing and Feedback

ImCreate Studios Fullstack Developer

11/2023 – 01/2024

The company asked me to design a payment automation within their APIs functionality. The implementation was specifically to quickness the finance along the users, referrals and contributors

Key Responsibilities:

- API Integration
- Database Management
- Data Governance and privacy
- Automation

Appen Backend Developer

02/2020 – 08/2023

In my first professional role as a Backend Developer with the Appen Team, I was instrumental in implementing server-side development and ensuring the robustness and reliability of various applications.

Key Responsibilities:

- Backend Development
- Testing
- Collaboration
